# Computational Mechanics

**Solids, Fluids, Fracture, Transport Phenomena**
**Multi-Body Dynamics and Variational Methods**

**Vol. 9 · 1991/92**

Editors-in-Chief

**S. N. Atluri**
Atlanta

**G. Yagawa**
Tokyo

**Springer International**

**Table of contents**

Aharoni, D., Bar-Yoseph, P.: Mixed finite element formulations in the time domain for solution of dynamic problems 359
Aoki, K.: see Ido, S. et al. 305
Arora, J. S.: see Lin, T. C. 27, 41
Atluri, S. N.: see Yoda, T. 390
– see Iura, M. 417

Balakrishnan, A. V.: Bounds on noise response of structures 375
Bar-Yoseph, P.: see Aharoni, D. 359
Bishop, S. R.: see Koliopulos, P. K. et al. 405

Chen, T. C.: see Lai, W. B. et al. 55

Daniel, I. M.: see Karalekas, D. et al. 17
Dodds, Jr., R. H.: see Healy, B. E. 95

Falgueras, J.: see Ramos, J. I. 1
Folias, E. S.: see Zhong, F. H. 233

Gdoutos, E. E.: see Karalekas, D. et al. 17
Gellert, M.: see Harbord, R. et al. 173
Giambanco, F., Palizzolo, L., Panzeca, T.: A bounding technique for plastic deformations 153
Gross, D.: see Zhang, Ch. 137

Harbord, R., Knippers, J., Gellert, M.: A mixed/hybrid FE formulation of elasto–viscoplastic problems 173
Healy, B. E., Dodds, Jr., R. H.: A large strain plasticity model for implicit finite element analyses 95

Ido, S., Aoki, K., Ishine, M., Kubota, M.: Personal supercomputing by using transputer and Intel 80860 in plasma engineering 305
Ishine, M.: see Ido, S. et al. 305
Iura, M., Atluri, S. N.: Formulation of a membrane finite element with drilling degrees of freedom 417

Kang, S.-H.: see Oh, K.-J. 85
Karalekas, D., Gdoutos, E. E., Daniel, I. M.: Micromechanical analysis of nonlinear thermal deformation of filamentary metal matrix composites 17
Kim, S.: see Phan-Thien, N. 121
Knippers, J.: see Harbord, R. et al. 173
Koliopulos, P. K., Bishop, S. R., Stefanou, G. D.: Effect of variation of input bandwidth on the response of hardening Duffing oscillators 405
Kounadis, A. N.: An efficient and simple approximate technique for solving nonlinear initial and boundary-value problems 221
Krishnasamy, G., Rizzo, F. J., Rudolphi, T. J.: Continuity requirements for density functions in the boundary integral equation method 267
Kubota, M.: see Ido, S. et al. 305
Kucharski, St.: see Lewiński, T. 249

Lai, W. B., Chen, T. C., Weng, C. I.: Transient thermal stresses of work roll by coupled thermoelasticity 55
Lam, K. Y., Liew, K. M.: A numerical model based on orthogonal plate functions for vibration of ring supported elliptical plates 113
Lewiński, T., Kucharski, St.: A model with length scales for composites with periodic structure. Steady state heat conduction problem. Part 1 249
Liang, S.-J.: see Shyy, W. 285
Liew, K. M.: see Lam, K. Y. 113
Lin, T. C., Arora, J. S.: Differential dynamic programming technique for constrained optimal control. Part 1: theoretical development 27
Lin, T. C., Arora, J. S.: Differential dynamic programming technique for constrained optimal control. Part 2: structural examples 41

Mei, C. C.: see Tong, P. 195

Nakao, K.: see Yagawa, G. et al. 333
Namburu, R. R.: see Tamma, K. K. 73
Nikishkov, G. P.: Piminov, V. A.: Computation of weight functions for three-dimensional cracks by the boundary element method 211

Oh, K.-J., Kang, S.-H.: Full scale Reynolds number effects for the viscous flow around the ship stern 85

Palizzolo, L.: see Giambanco, F. et al. 153
Panzeca, T.: see Giambanco, F. et al. 153
Phan-Thien, N., Tullock, D., Kim, S.: Completed double layer in half-space: a boundary element method 121
Piminov, V. A.: see Nikishkov, G. P. 211

Ramos, J. I., Falgueras, J.: Response of annular liquid jets to mass loading 1
Rizzo, F. J.: see Krishnasamy, G. et al. 267
Rudolphi, T. J.: see Krishnasamy, G. et al. 267

Schmid, G.: see Wang, S. 347
Shyy, W., Liang, S.-J.: Interaction of time stepping and convection schemes for unsteady flow simulation 285
Soneda, N.: see Yagawa, G. et al. 333
Stefanou, G. D.: see Koliopulos, P. K. 405

Tamma, K. K., Namburu, R. R.: An effective finite element modeling/analysis approach for dynamic thermoelasticity due to second sound effects 73
Tanabe, M.: A simple and efficient algorithm of automatic mesh generation for a general plate and frame structure with holes 185
Tong, P., Mei, C. C.: Mechanics of composites of multiple scales 195
Tullock, D.: see Phan-Thien, N. et al. 121

Wang, S., Schmid, G.: Dynamic structure-soil-structure interaction by FEM and BEM 347
Weng, C. I.: see Lai, W. B. et al. 55
Wiberg, N.-E.: see Zeng, L. F. 315

Yagawa, G., Yoshimura, S., Soneda, N., Nakao, K.: Automatic two- and three-dimensional mesh generation based on fuzzy knowledge processing 333
Yoda, T., Atluri, S. N.: Postbuckling analysis of stiffened laminated composite panels, using a higher-order shear deformation theory 390
Yoshimura, S.: see Yagawa, G. et al. 333

Zeng, L. F., Wiberg, N.-E.: Spatial mesh adaptation in semidiscrete finite element analysis of linear elastodynamic problems 315
Zhang, Ch., Gross, D.: 3D elastodynamic crack analysis by a non-hypersingular BIEM 137
Zhong, F. H., Folias, E. S.: The 3D stress field of a fiber embedded into a matrix and subjected on an axial load 233
